The most complete finishes, offering unmatched protection

liv

Our standard high-performance protection. The new **liv** incorporates densified biopolymers that minimize surface scratches and the adherence of dirt, marks and stains. It delivers enhanced protection while simplifying maintenance. With unmatched clarity and smoothness, it highlights the full, natural beauty of the wood for an ultra-polished look.

livUP*

A tough, clear finish formulated for ultimate protection. The **livUP** finish has an outstanding track record for durability in commercial-grade applications and high-traffic environments. This exceptionally durable and clear matte finish keeps floors looking great through years of wear and tear. Great for young families and pet owners.

FEATURES

DURABILITY

liv

Enhanced resistance to surface scratches
10X more resistant than previous Mercier finish.

livUP

Superior resistance to wear and tear
Microfragmented aluminum particles create a multipoint contact surface that provides increased scratch through resistance and retains the floor's original luster for longer.

DEGREE OF RESISTANCE

The TABER test involves mounting a portion of a finished board onto a turntable fitted with sheets of abrasive paper. The degree of resistance is evaluated based on the number of rotations it takes to completely wear down the finish. The higher the number of cycles, the more resistant the finish.

1,000 cycles

Compared to 500 cycles from the competition.

2,500 cycles

Compared to 1,500 cycles from the competition.

STAIN RESISTANCE

Stain resistant

Superior stain resistance

CLEANLINESS AND MAINTENANCE

Reduces the adherence of dirt, residues and smudges, making the surface easier to clean.

Reduces the adherence of dirt, residues and smudges, making the surface easier to clean.

ANTI-PERFORATION

Perforation-resistant

Anti-perforation

FLEXIBILITY

Flexible

Highly flexible

WATER RESISTANCE

Water resistant

Repels water

The molecule adhesion between the finish and the surface of the wood creates a barrier that repels water and other liquids in the event of spills. This permanent bond prevents the finish from peeling.

ANTIMICROBIAL TREATMENT

The antimicrobial contained in our finishes helps reduce the risk of spreading bacteria and mildew. Completely non-toxic, this special treatment adds an additional level of protection for healthier floors.

NON-YELLOWING

Our non-yellowing process consists of 2 different UV screens that protect the original color of the floor from various light sources that could alter it:

- A UV screen against yellowing of the finish when exposed to natural or artificial lighting
- A UV screen to create a protective barrier that delays the yellowing of the natural wood and reduces the intensity of the color change when the latter occurs

HYPOALLERGENIC

GREENGUARD GOLD CERTIFIED

CONTAINS PLANT-BASED OIL
